[REDACTED]

05:09 1 and many people -- E mail was the preferred form of
05:10 2 communication in the company.

05:10 3 Q. And did you -- Again, did you
05:10 4 search any of the word "system" documents to see if
05:10 5 there were any materials --

05:10 6 A. Every document that I've ever
05:10 7 reviewed that I can -- To the best of my knowledge,
05:10 8 was usually E mailed to me, you know. That was --
05:10 9 because I was not always -- I was moving -- I was
05:10 10 moving between traveling a lot, and in general, the
05:10 11 -- People would E mail it to me, so it would be my
05:10 12 E mailbox and I've searched that entire E mail box.

05:10 13 Q. How far back does your E mail box
05:10 14 go back?

05:10 15 A. It goes back to well before Power
05:10 16 was started.

05:10 17 Q. Was any type of request sent out
05:10 18 to all employees of Power that they maintain
05:10 19 records of everything related to the development of
05:10 20 the Facebook integration?

05:10 21 A. No.

05:10 22 Q. So none of the employees were any
05:10 23 informed instructed to maintain their records?

05:11 24 A. No. They were not.

05:11 25 Q. So -- what was -- For how much

The figure consists of a 20x20 grid of black bars. The bars are arranged in a pattern where most are horizontal and some are vertical. Horizontal bars are longer than vertical bars. Vertical bars are located at the top-left, top-right, and bottom-left positions. The grid is set against a white background.

A 20x20 grid of black bars representing data points. The bars are arranged in a pattern where most are long and horizontal, with occasional shorter bars and small squares. The grid is set against a white background.

A horizontal bar chart showing the distribution of 100 data points across 20 bins. The x-axis represents the value of the data points, ranging from 0 to 100. The y-axis represents the frequency of data points in each bin. The distribution is highly right-skewed, with the highest frequency in the first bin (0-10). The frequency decreases as the value of the data points increases, with a significant drop-off after the 10-20 bin.

Bin Range	Frequency
0-10	100
10-20	10
20-30	5
30-40	2
40-50	1
50-60	1
60-70	1
70-80	1
80-90	1
90-100	1
